

PROCESS

FEECO provided the process design and supply of a disc pelletizing system for producing agglomerated Calcium Carbonate. Equipment included a rotary pre-dryer, pin mixer, 14' (4.2m) pelletizing disc, fluid bed dryer/cooler, and lab test equipment. We also assisted with equipment erection and start-up, including operator training.

PROJECT SPECS

Customer:

Acheson & Glover

Equipment Supplied:

Disc Pelletizing System Equipment and Engineering Services

Project Location:

Belcoo, Northern Ireland

Industry:

Industrial Minerals

Material:

Limestone Fines

Project Engineer:

FEECO International, Inc. | Colloide Engineering
